

PUBG

PlayerUnknown
Battlegrounds

Our solution:

IOS Assignment 3
Presenting by Group - 122

- 227 Million user playing pubg in 2018 making it most popular game in world wide.
- 100 Million active user in every day.
- 360 Million times PUBG has downloaded in IOS devices.

PUBG

Initial Screen

So, Who is our audience?

1. According to our idea this app is for the people who plays PUBG
2. User who have no idea which Gun they should take for the battlefield
3. Growing number of user increasing rapidly without knowing what they are playing for.
4. This app will help them understand different guns stats.

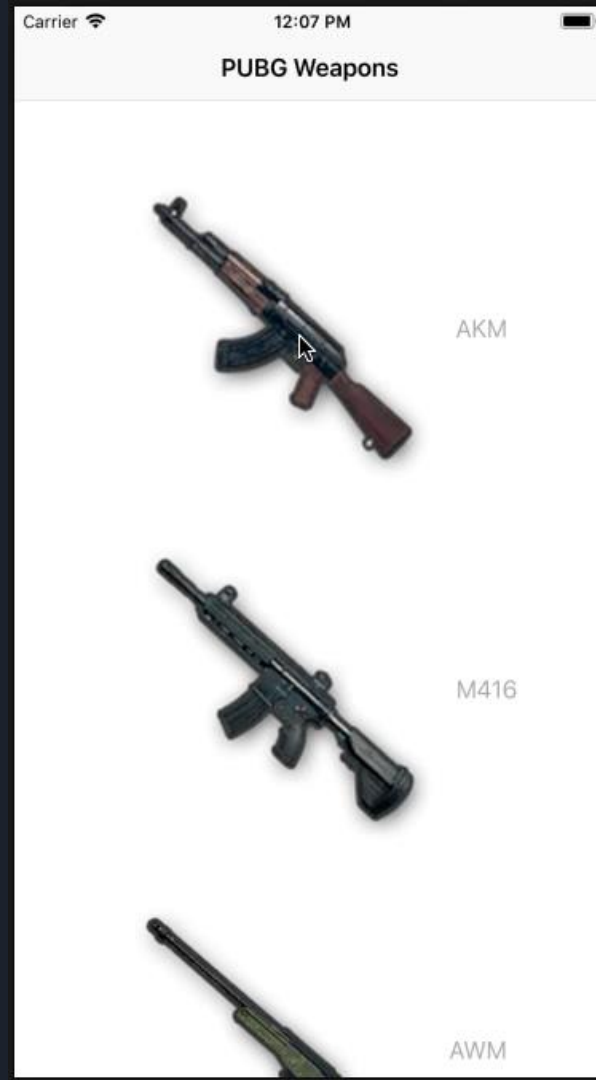

So what problem is being solved by this app?

- Once the game starts we cannot pause it and get the information on google. So, this application will be used to provide guns stats during the game. For example: you can run this app background and play PUBG. whenever you need to know the stats you can swipe the app and get the information. It's easy and user friendly.

How the app is working?

Guns Stats

Thank you :)
